ABOUT ME

I have a clear, logical mind; I take a practical approach to problem-solving; and I am driven to see things through to completion. In addition to my strong technical skills, I have developed excellent interpersonal skills through years working not only as an engineer, but also as a negotiator, settling the terms of projects and closing deals. This sets me apart from most of my industry peers and enables me to interact with a wide range of clients. I have years of experience in managing and leading teams, and I take a mature and responsible approach to any task I undertake or any situation I am faced with. I am energetic and ambitious, yet dedicated, hardworking, and focused. I am eager to learn, I enjoy overcoming challenges, and I have a genuine interest in making organisations successful. I am seeking an opportunity to utilise my unique combination of valuable skills in a challenging working environment and to become an asset to the organisation that I work for.
